## Contents

※Language: English

It is very important to present your research at international conference. This seminar will provide useful advice on preparing and delivering oral presentations. The lecture will discuss organization of your talk, slide preparation, mental preparation, time management, body language, and how to avoid "Death by PowerPoint" and so on.

The lecture will also discuss about how to use tables and figures for efficient visual presentation. For example, the elements of tables and figures, principles, common errors in the visual presentation of information will be reviewed.

The lecture will also describe some resources for assisting science writers and presenters, including references texts, websites, self-study options, massive open online courses, and relevant professional organizations.

## Lecturer

**David Kipler** Cactus Communications K.K.

Writer/editor/trainer with more than 25 years of experience helping authors and presenters whose first language is not English; certified by Board of Editors in the Life Sciences; extensive experience in Japanese higher education.

Skills: Science and technical communication training; writing and editing journal articles on basic and clinical biomedical research; manuscript rewriting.
